

# Industry Certificates

## Preparation for the Exam AI-900: Microsoft Azure AI Fundamentals

### Instructors:

**Gergő Bogacsovics, Róbert Lakatos, András Hajdu**  
**Faculty of Informatics\*, University of Debrecen**

\*Faculty of Informatics is a Microsoft AI Centre from 2019

# Value of Industry Certificates

„They’re looking for reasons to hire candidates ...

if they see anything that’s relevant to their industry, to their company, to the specific position, it’s definitely going to help to make that candidate more attractive.”

(Tim Gates, Adecco Staffing, Senior Regional Vice President)

# Industry Certificates – Key Benefits

- Validation of knowledge
- Increased marketability
- Increased earning power
- Enhanced academic performance
- Improved reputation
- Enhanced credibility
- Increased confidence
- Respect from peers

# Industry Certificates – Improve Academic Performance

- Higher grade point average for certified high school students: 3.12 vs 2.78 (4.0 scale)
- Higher graduation rates for certified high school students: 97.5% vs 78.4%
- Increased post-secondary enrollment: 84% vs 82%
- Reduced dropout rates: 0.2% vs 1.0%

# Industry Certificates – Advantages to Professionals

- IT professionals with certifications have an average salary of \$111,334, 7% more than non-certified professionals
- IT professionals who gained new skills and/or certifications last year received an average raise of \$12,000-\$13,000
- 91% of hiring managers report certification is an important criterion for hiring
- Certification makes job candidates stand out in a crowded job market
- Certification makes a better case for that big raise or promotion
- Third-party validation of skills is far more powerful than self-promotion of knowledge

# Industry Certificates – Faculty of Informatics

- Validating course materials with our industrial partners
- Validating available industry certificates with our industrial partners (are they indeed valuable?)

# Industry Certificates – Faculty of Informatics

- **Setting up an authorized testing center(s)**
- **Integrating certificate materials into our courses**
- **Offering very economic exam possibilities to our students**
- **Motivating our students to gain industry certificates (grants, mentoring, special college enrollment, counting certificates in our regular courses,...)**
- **Motivating our lecturers to gain industry certificates**

# Industry Certificates – CERTIPOINT

## CERTIPOINT

A PEARSON VUE BUSINESS

Founded in 1997, and later acquired by Pearson VUE in 2012, Certiport delivers more than 3 million global exams annually through a network of 15,000+ Certiport Authorized Testing Centers (CATCs).

# Industry Certificates – CERTIPORT (for later use)

The poster features the CERTIPORT logo in the top right corner, which includes the letters 'its' in a stylized blue font followed by the text 'INFORMATION TECHNOLOGY SPECIALIST'. The main title 'IT SPECIALIST EXAMS' is written in large, bold, dark blue capital letters on the left side. To the right of the title is a numbered list of 14 exam topics. The bottom of the poster has a grey bar with the text 'LEARN | PRACTICE | CERTIFY' on the left and the 'CERTIPORT' logo on the right.

its INFORMATION TECHNOLOGY SPECIALIST

## IT SPECIALIST EXAMS

1. Databases
2. Software Development
3. Networking
4. Network Security
5. JavaScript
6. Java
7. Python
8. HTML and CSS
9. HTML5 Application Development
10. Device Configuration and Management
11. Artificial Intelligence (Oct)
12. Cloud Computing (Dec)

# AI-900 Exam Preparation Materials

## Preparation Lectures

- based on Instructors' Handbook as single PDF, which is not available directly for students

## Learning Paths for Students

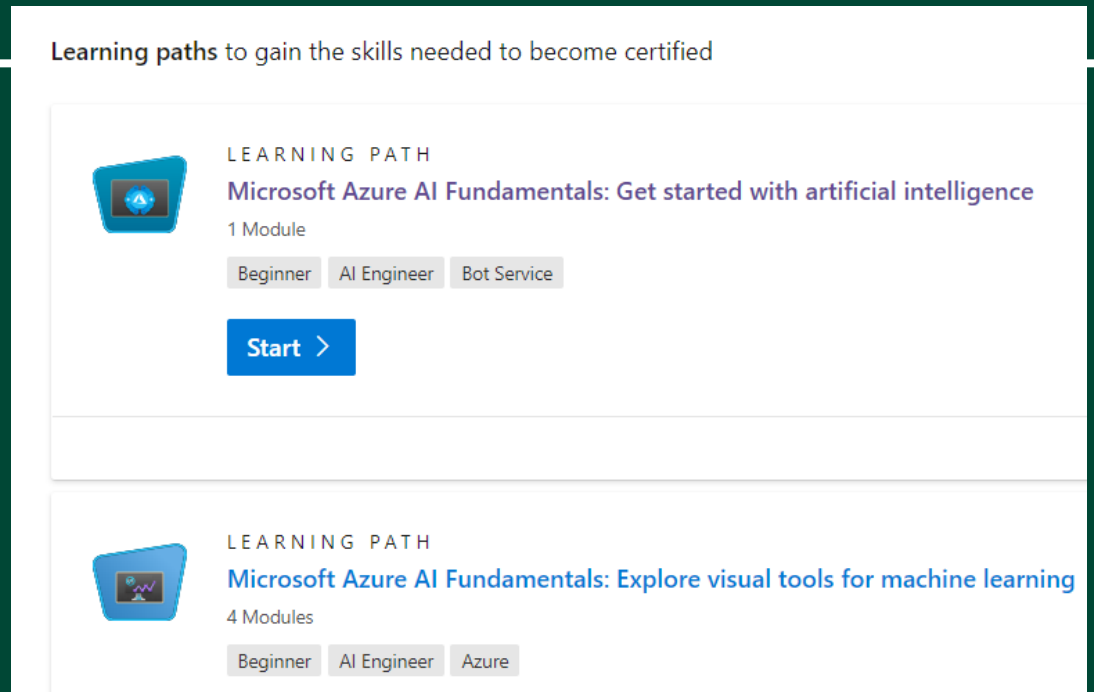

- Basically equivalent with Instructors' Handbook
- Available at: <https://docs.microsoft.com/en-us/learn/certifications/exams/ai-900>

Microsoft Official Course

AI-900T00  
Microsoft Azure AI Fundamentals

The image shows a Microsoft Official Course banner for AI-900T00. It features the Microsoft logo at the top right, the text 'Microsoft Official Course' on the left, and a circular graphic on the right containing icons for a lightbulb, a cloud, a code symbol, and a circuit. Below the banner, the course ID 'AI-900T00' and the title 'Microsoft Azure AI Fundamentals' are displayed.

Learning paths to gain the skills needed to become certified

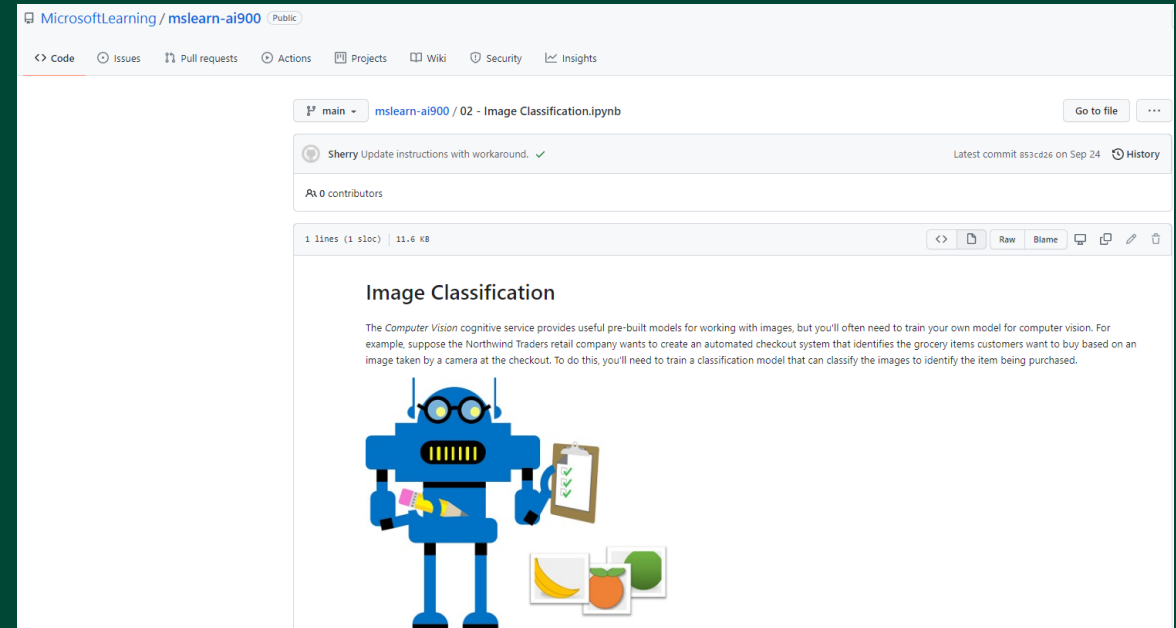

LEARNING PATH  
Microsoft Azure AI Fundamentals: Get started with artificial intelligence  
1 Module  
Beginner AI Engineer Bot Service  
Start >

LEARNING PATH  
Microsoft Azure AI Fundamentals: Explore visual tools for machine learning  
4 Modules  
Beginner AI Engineer Azure

The image shows a screenshot of learning paths on the Microsoft Learn platform. It lists two paths: 'Microsoft Azure AI Fundamentals: Get started with artificial intelligence' (1 Module, Beginner, AI Engineer, Bot Service) and 'Microsoft Azure AI Fundamentals: Explore visual tools for machine learning' (4 Modules, Beginner, AI Engineer, Azure). Each path has a 'Start >' button.

# AI-900 Exam Preparation Materials

- Lab Exercises on Github (Tutorials as Jupyter Notebooks, Python)
- Tutorial Videos by Instructors
  - Lab Exercises (Domain Knowledge, Deployment of AI Services in Azure)
  - MS Azure Fundamentals\* (Signing In, Student Credits, Resources)
    - \* Thanks to Prof. Tamás Bérczes

1. Run the code cell below by clicking the **Run cell** (>) button (to the left of the cell) to set the variables to your project ID, key, and endpoint values.

```
In [ ]: project_id = 'YOUR_PROJECT_ID'
cv_key = 'YOUR_KEY'
cv_endpoint = 'YOUR_ENDPOINT'

model_name = 'groceries' # this must match the model name you set when publishing your model iteration (it's case-sensitive)!
print('Ready to predict using model {} in project {}'.format(model_name, project_id))
```

Now you can use your key and endpoint with a Custom Vision client to connect to your custom vision classification model.

Run the following code cell to classify a selection of test images using your published model.

**Note:** Don't worry too much about the details of the code. It uses the Computer Vision SDK for Python to get a class prediction for each image in the /data/image-classification/test-fruit folder

```
In [ ]: from azure.cognitiveservices.vision.customvision.prediction import CustomVisionPredictionClient
from msrest.authentication import ApiKeyCredentials
import matplotlib.pyplot as plt
```

# Preparation Materials (what is needed?)

- Preparation Lectures -> very useful to successfully pass the exam
- Learning Paths for Students, module description slides -> critical to pass the exam
- Lab Exercises on Github -> less critical to pass, but very useful for later AI activities
- Tutorial Videos by Instructors
  - Lab Exercises (Domain Knowledge) -> very useful to successfully pass the exam
  - Lab Exercises (Deployment of AI Services in Azure) -> less critical to pass, but very useful for later AI activities
  - Lab Exercises (Python coding) -> not critical to pass, but very useful for later AI activities
  - MS Azure Fundamentals (Signing In, Student Credits, Resources) -> not part of the exam, but needed to setup MS Azure

# Possibility for Test Exams as a Preparation

- A very(!) useful possibility for those enrolling to the exam is to have access to test exams
- Test exams has similar (not the same!) questions than the real one

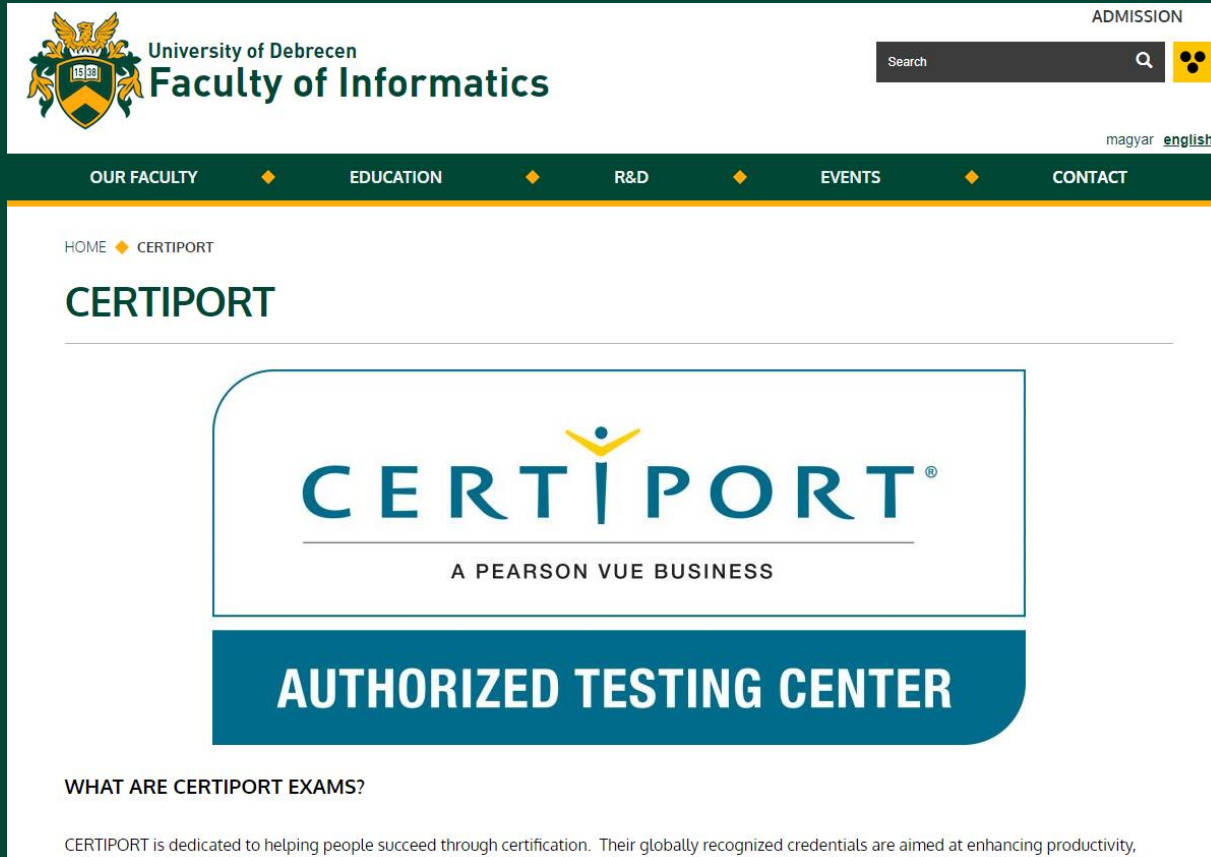

# How to enroll to the exam?

- Everywhere use your ...@mailbox.unideb.hu account!!!  
(in MS Azure for preparations you can use other accounts, but it is not related to the official exam)
- Visit the Faculty CERTIPOINT web page (<https://inf.unideb.hu/hu/certiport> or <https://inf.unideb.hu/en/certiport>) and enroll there to the AI-900 exam via the corresponding form
- After that you will receive information on accessing the preparation materials and how to register to certipoint.com and to the portal of test exams, and also regarding the possible exam dates.
- Enrollment is open at any time! (e.g. not mandatory to participate on the preparation lectures)

# Technical Information about the Exam

- All the information is available at [www.inf.unideb.hu/en/certiport](http://www.inf.unideb.hu/en/certiport), but
  - Price of the exam is much(-much) lower than on the market (we aimed to make it available for low budget persons as well)
  - Preparation is for free for Faculty students/members
  - Passing the exam successfully will be rewarded by some reimbursement from the pre-paid exam price (no reimbursement in case of failure!)
  - In case of failure retake is possible with the same conditions
- You have to prepare a quiz-like exam (~35-45 questions, ~45 minutes)

# Technical Information about the Exam

The screenshot shows the website header with the University of Debrecen Faculty of Informatics logo and name. A search bar and language selector (magyar/english) are visible. The navigation menu includes: OUR FACULTY, EDUCATION, R&D, EVENTS, and CONTACT. The breadcrumb trail is HOME > CERTIPORT. The main heading is CERTIPORT. Below it is a large graphic with the CERTIPORT logo and the text 'A PEARSON VUE BUSINESS' and 'AUTHORIZED TESTING CENTER'. At the bottom, there is a section titled 'WHAT ARE CERTIPORT EXAMS?' with a short introductory paragraph.

## Enrollment Form for CERTIPORT Exam

Szia, András. Az űrlap elküldésekor a tulajdonos látni fogja a nevét és az e-mail címét.

\* Kötelező

1. Are you a Higher Education (e.g. student) or Business member? \*

Higher Education

2. Choose an exam \*

<b>Module 5 Conversational AI</b>	43
Conversational AI Concepts	43
Conversational AI in Azure	46

# AI-900 Insctructors' Handbook, Contents

## Module 1: Introduction to AI

In this module, you'll learn about common uses of artificial intelligence (AI), and the different types of workload associated with AI. You'll then explore considerations and principles for responsible AI development.

## Module 2: Machine Learning

Machine learning is the foundation for modern AI solutions. In this module, you'll learn about some fundamental machine learning concepts, and how to use the Azure Machine Learning service to create and publish machine learning models.

## Module 3: Computer Vision

Computer vision is a the area of AI that deals with understanding the world visually, through images, video files, and cameras. In this module you'll explore multiple computer vision techniques and services.

## Module 4: Natural Language Processing

This module describes scenarios for AI solutions that can process written and spoken language. You'll learn about Azure services that can be used to build solutions that analyze text, recognize and synthesize speech, translate between languages, and interpret commands.

## Module 5: Conversational AI

Conversational AI enables users to engage in a dialog with an AI agent, or *bot*, through communication channels such as email, webchat interfaces, social media, and others. This module describes some basic principles for working with bots and gives you an opportunity to create a bot that can respond intelligently to user questions.
